

**UNLOCK YOUR
EQUIPMENT'S FULL
POTENTIAL WITH OUR
EXPERT TRAINING**

Customer Training

Empower your team with the knowledge they need to succeed!

As part of our new customer-focused training institute, we are excited to offer a variety of comprehensive bespoke training programs designed to meet your needs:

- » Introduction to crushing and screening
- » Basic and advanced fault finding on electrical and hydraulics
- » Machine familiarisation
- » Cone, jaw, and screen changing
- » Factory levels of training

All training sessions are conducted at our state-of-the-art training facility at our head office in QLD, equipped with a dedicated interactive test bench for safe and effective assessment. We also offer on-site training at your location, tailored specifically to your machinery and operational requirements.

- » Customisable training programs
- » Small class sizes (2-12 participants)
- » Flexible course lengths (2 days to 1 week)
- » Hands-on experience with real equipment
- » Focus on safety and efficiency
- » Certificate of training completion

Interactive Areas

This space is designed to give participants the opportunity to engage directly with equipment and tools, providing real-world experience in a controlled, safe environment.

Cone Crusher Area

Explore the inner workings of nodes, PLCs, PDMs, metal detectors, and transducers.

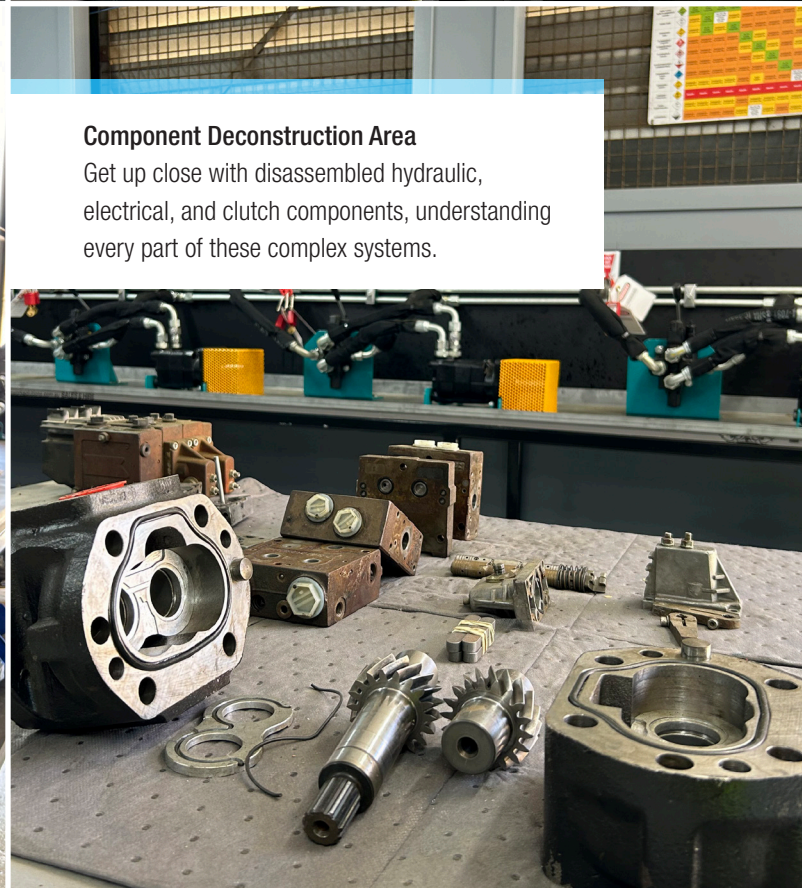

Jaw Crusher Area

Learn how to navigate the main control panel and safely handle e-stop circuits.

Hydraulics Area

Gain in-depth knowledge of flow and pressure relief testing, PVG valves and critical hydraulic systems.

Component Deconstruction Area

Get up close with disassembled hydraulic, electrical, and clutch components, understanding every part of these complex systems.
